

Accelerating the Future of Packaging Through Sustainable, Engineered Solutions

We understand that packaging plays a crucial role in safeguarding your products, reducing waste and ensuring your business operates efficiently. With more than 30 plants across North America, we design and deliver packaging solutions to an array of markets including:

Aerospace & Defense

Automotive

Data Center/Cloud Infrastructure

Electronics

Energy

Industrial

Medical

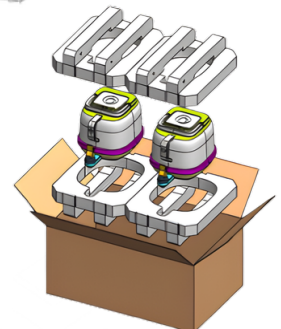

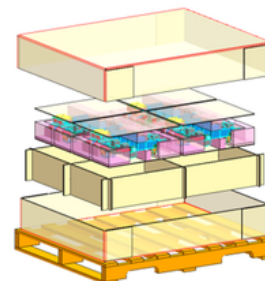

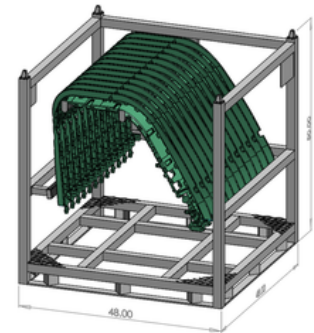

About Us

Specialized Packaging Group (SPG) is a leading vertically integrated manufacturer of protective packaging products and services. From foam/bubble cushioning and corrugated paper/plastic kits to molded pulp and custom engineered wood crates, metal racks, thermoformed trays and inserts, and expendable or returnable solutions, we do it all.

With more than 50 design engineers and 30+ plants throughout the United States, Mexico and Canada, we deliver innovative, sustainable, expendable, and reusable packaging solutions that eliminate transit damage, reduce your supply chain cost, and minimize environmental impact.

SPG's Innovation Center, located in Silicon Valley, unites customers and engineers to co-create sustainable packaging solutions. This hub features a state-of-the-art lab for real-time validation, observation, and testing.

Our consultative approach ensures value driven, measurable results.

A Commitment to Circularity

Our goal is to transform waste into capital. By rethinking, redesigning and refurbishing product packaging, we create expendable and reusable solutions that decrease your environmental footprint. We are committed to finding innovative ways of transforming packaging waste into stronger, smarter protective packaging.

One Stop Custom Packaging Provider

- Vertically integrated to ensure continuity of supply and cost-effective solutions
- Design engineers dedicated to creating high-performance solutions
- Rapid prototyping and testing services
- Broad industry knowledge committed to innovation and strong relationships
- Manufacturing and fulfillment footprint across North America
- Competitive material cost to provide lower total packaging costs
- Ensured continuity of supply with just-in-time delivery
- Packaging reutilization, refurbishment and recycling
